

Adrian Griffiths – CEO (139 words)

Adrian is the founder and Chief Executive Officer of Recycling Technologies Ltd. He is dedicated to creating value from plastic wastes globally; “You can help solve the problem of plastic in our oceans, by making waste plastic valuable on land” Adrian says. Adrian graduated as an engineer from Imperial College, London and spent many years in the automotive, aerospace and nuclear sectors. Having previously worked as a consultant and engineering manager, Adrian has extensive strategic planning, commercial, operations and technical experience in a variety of sectors. He previously co-founded two successful UK businesses, OEE Consulting and Vendigital. Adrian founded Recycling Technologies to provide a real solution to a global environmental problem. With over twenty years’ experience as a management consultant, Adrian appreciates the need for such ventures to be sound commercial opportunities as well as providing an environmental service.

- Headquarters: Swindon, England, UK
